

NORTON BACK-UP PADS FOR MAXIMUM PRODUCTIVITY

Define the Job, Then Pick the Pad

Two profiles and two densities give you all the options you need for any sanding job.

Durable polyurethane foam on a fiberglass backing plate provides a consistent surface for a consistent finish. All pads are individually spin-balanced for better control and performance on all tools.

Each pad is protected by a sturdy, clam shell package ready for pegboard display. A cap protects the threaded spindle and two washers are included for proper fit and spacing on any D/A tool.

Low Profile, Soft Density

For Medium To Fine Grit Sanding
(Soft, thicker foam for contours)
Grits – 320 and Finer
12,000 rpm

Low Profile, Medium Density

For Coarse to Medium Grit Sanding
(Hard edge)
Grits – 320 and Coarser
15,000 rpm

Tapered Edge, Medium Density

For Coarse to Medium Grit Sanding
(Flexible edge, easy to reach small contours)
Grits – 320 and Coarser
15,000 rpm
