**NORTON GOLD 290**  
**THE HARDEST-WORKING SANDPAPER FOR THE MONEY.**

With GOLD 290 from Norton, body shop pros can get the job done fast and save time and money. GOLD 290 may be worth its weight in gold... but we won't charge you that much for it!

**NORTON**

# GOLD 290 FROM NORTON

**W**hat makes the GOLD 290 family of sandpapers deliver? A sharp, hard p-graded aluminum oxide abrasive, bonded to a tough, tear resistant durable paper. The result? A high-performance sandpaper that produces a quick, cool cut at a non-premium price, while a resin bond system offers longer work life and higher resistance to wear.

## Built to Last

GOLD 290 not only cuts faster, it does so without clogging or loading. Which means you increase your productivity and save precious time on the job. So much so, in fact, that no other comparably priced sandpaper even comes close!

## Excellent Conformability

Gold 290's tough, flexible backing adds contour hugging capability and better resists wrinkles, tearing and edge-chipping.

## For Great Performance and Value, Watch Gold 290 go to Work!

Put down the paper you're using now! Because, for the money, nothing beats GOLD 290's fast, cool cutting and consistent, high-quality finish. To get the job done right, first-time, every time use GOLD 290 for just about everything a sandpaper can do:

- Feather-edging
- Sanding primers
- Stripping old paint
- Dry sanding plastic and putty
- Removing burrs and scratches
- Cutting down filler
- Even light metal sanding and weld blending

**THE HARDEST-WORKING SANDPAPER FOR THE MONEY.**

## THE HARDEST-WORKING SANDPAPER FOR THE MONEY

### THE NORTON NO-RISK TEST POLICY

NORTON is so confident of the superior performance of its automotive aftermarket refinishing products, as recommended for specific applications, that we invite in-shop tests against any other brand of abrasive, masking, buffing or structural adhesive products on the market.

TO MAKE IT EASY as possible for users to make their own judgement of the time, labor and money savings advantages of Norton products, and to assure users that they have absolutely nothing to lose and everything to gain by conducting an in-shop test...

- 1 The test will be conducted in the user's own shop, on their machines and their work pieces.
- 2 If the Norton product tested proves completely unsatisfactory, the user will receive a full refund.
- 3 If the Norton product tested performs at a lower level than the product presently being used, the user will receive an adjustment to make up the difference in performance.
- 4 THE USER IS THE FINAL JUDGE OF PERFORMANCE
